

Henry Warfield
Electronics Freshman Report

Freshman Full Name

Ian Maguire

Robert Wells

What is your freshman interested in? (Sports, hobbies, work, etc.)

Ian: Making things

Robert: Anything mechanical

What are the seven shops your freshman is exploring?

Ian: Electronics, Health, Multimedia, Engineering, HVAC, Auto Tech, IT

Robert: Electronics, Auto Collision, Auto Tech, Electrical, Engineering, Advanced Manufacturing, Cosmetology

Besides helping others what did your freshman do to show leadership?

Ian: Led most of the coding for their robot group.

Robert: Led the robot group to a somewhat victorious position.

What Electronics Exploratory activity did your freshman enjoy the most? Why?

Ian: Tinkler because he said it was fun and he will be able to prank his family.

Robert: Robot coding because he liked seeing his code become actual actions.

What Electronic Exploratory activities(s) was your Freshman not interested in? Why?

Ian: Splicing of the wires because it was tedious.

Robert: Learning how to solder because he already knew how to solder.

What difficulties did your Freshman have this week? (things that may not have gone well or were difficult for your freshman)

Ian: Soldering the tingler as some of the solder points were very close to each other.

Robert: Keeping the solder where it's supposed to be which causes solders that need to be redone.

Do you recommend this student for the electronics shop? Why?

I recommend Robert because he says it might be his first choice and he was already good with soldering and did all the projects well.

I will not recommend Ian because he says he will probably not choose this shop but he did say he had fun just he doesn't think of this as his full career.
